SPRING 2005 CONFERENCE

“Non-Ionizing Radiation Safety”

SPRING PDC ON MARCH 2ND AND 3RD

Do you receive questions about cell phones and brain cancer? About power frequency fields and leukemia? When does the enclosed laser at your facility pose a hazard to employees? With so many different and prevalent forms of non-ionizing radiation, do you feel inundated and unsure of where to focus your initial efforts in establishing a program? Or do you just need an overview of non-ionizing radiation protection in preparation for the CIH exam? If you have answered “yes” to any of these questions, this PDC is designed just for you.

The “Non-Ionizing Radiation Protection” PDC is an overview course that will include ultraviolet radiation, laser radiation, radio-frequency radiation and extremely low frequency fields. The course will include demonstration of measurement equipment. All attendees will need to bring a calculator with scientific functions.

The course is being taught by R. Timothy Hitchcock, CIH, CLSO, a recognized expert in the field of non-ionizing radiation protection with over 25 years of experience.

You will earn 1CM point for your participation in this course.

*Fall 2005 Conference and PDC
Kingston Plantation
September 14th – 16th
Myrtle Beach, SC*

Conference Agenda

Wednesday, March 2nd

1:00 – 5:00 p.m. PDC
